SUMMARY

Software Development enthusiast skilled in problem-solving, React, HTML, CSS, JavaScript, Java, and Spring Boot, with experience building full-stack applications through academic and personal projects. Strong understanding of backend APIs and scalable system design. Seeking an entry-level SDE or internship role to apply technical skills and grow in a collaborative engineering environment.

EDUCATION

Sipna College of Engineering and Technology

B.E (Pursuing) - Computer Science and Engineering, CGPA: 8.0

2024 – 2027

Amravati, Maharashtra

Government Polytechnic

Diploma - Computer Engineering, Percentage: 84.16%

2021 – 2024

Amravati, Maharashtra

EXPERIENCE

Skolliq – Software Developer Intern

Backend Development & UI Design

Aug 2025 – Oct 2025

Remote

- Developed backend logic and database tables for a school event management system.
- Built APIs to manage sports and cultural events using structured database design.
- Designed user-friendly event interface prototypes using Figma.

TECHNICAL SKILLS

Languages: Java, C, C++, JavaScript, SQL,

Developer Tools: VS Code, GitHub, ChatGPT

Technologies/Frameworks: ReactJS, MySQL, Spring Boot

PROJECTS

Quiz Project | Spring Boot, React, PostgreSQL

- AI-QuizApp is an interactive online quiz platform designed for educational purposes.
- it allows Admins to generate quizzes automatically from any paragraph or topic using the Gemini API
- while Students can attempt quizzes using unique test codes, receive instant results, and track their performance history.

CivicKind — Civic Issue Reporting Platform | React, Spring Boot, MySQL

- Built an application for reporting and resolving local civic issues. Implemented JWT/OTP authentication, role-based admin workflows, geolocation-based issue discovery,
- image uploads via Cloudinary, voting/comments, notifications, and AI-powered issue summaries.

Media-AI | TypeScript, React, Tailwind CSS, mongodb

- A full-stack web application that lets users generate AI-powered social media content
- schedule posts across multiple platforms, and automate publishing.
- Automated background job system that publishes scheduled posts via cron

CERTIFICATIONS

• CoreJava

• IndustrialTraininginIoT

• GenerativeAI

ACHIEVEMENTS

- 2nd Prize – Techno Vision 2K24, Sipna College Project Competition 
- 2nd Prize – Devthon Competition, College Project Competition
